WhatsExposed

Enabling Service Providers to Adopt **Bespoke Security Testing** at No Cost & No Barriers to Entry

Expand your service offerings and enhance your market presence with WhatsExposed. Designed for seamless integration, our solution allows you to provide expert Security Testing services, fully branded as your own.

What We Offer?

Convenience

A packaged Security Testing Service that acts as an extension of your offerings.

Continuity

Move away from just-in-time assessments towards recurring revenue streams.

Cost

Competitive utilisation cost model giving you high margins & ability to sell ancillary services.

Your Benefits.

White-labelled Solution

A platform with built-in logic for security testing projects, fully white-labelled to reflect your brand.

Discover Untapped Opportunities

Upsell additional services such as security configurations, custom remediation services, and enhanced protection measures.

Sales Analytics

Increase monthly revenue through actionable opportunities based on historic data.

Unified Platform

A foundation for all security testing activities from booking a service, to reporting, to remediation.

100% of the testers hold CREST + OSCP certifications.

Your Customer's Benefits.

Certified Experts

CHECK, CREST and OSCP certified professionals who conduct manual Security Testing to provide contextual value.

Remediation Workflow

Real-time visibility & tracking of remediation workflow in line with SLAs, ensuring timely risk reduction.

Modern Reporting

Generate evidence based executive summary & low-level technical details at the click of a button.

Remain Compliant

Regulatory driven assessments providing insights and remediations that exceed baseline compliance.

Real-time Notifications

Real-time notifications provide visibility, accountability and timely request fulfillment.

CREST | **PEN TEST**

WhatsExposed are a CREST approved penetration testing provider.
